Financial economics is the branch of economics characterized by a "concentration on monetary activities", in which "money of one type or another is likely to appear on both sides of a trade". Its concern is thus the interrelation of financial variables, such as prices, interest rates and shares, as opposed to those concerning the real economy.

Introduction to Financial Accounting. 3 Units. Financial accounting is the measurement of economic activity for decision-making. The objective of this course is not to train you to become an accountant but rather to help you develop into an informed user of financial statement information. Through cases, homework assignments, and classroom discussion, we will focus on understanding the mapping ...
