In Principles, Dalio shares what he's learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book's hundreds of practical lessons, which are built around his cornerstones of "radical truth" and "radical transparency", include Dalio laying out the most effective ways for ...

Rationalists, unaware of the local origins of the universal principles that they imagine they have identified, reject knowledge gained through experience in favor of something they call reason or science. Whether deductive or computational, this abstract reason is thought to guarantee greater certainty than experience and judgment can provide. The fallacy of Rationalism, in other words, is ...
